

Do Animal Cells have a Cell Wall?

What are tiny cell structures that carry out specific functions with a cell?

What are cells walls made of?

What is the function of the cell membrane?

What is the name of the clear gel like fluid in a cell?

What organelle is considered the packaging and shipping department of the cell?

What is the name of the series of tubes and membranes that carry material around the cell?

In what small organelle is protein produced?

What cell organelle has its own DNA?

What cell organelle is referred to as the power house of the cell?

Organelles

NO!  
Only plant cells and some  
bacteria

Control what goes in and out  
of the cell

Cellulose

Golgi Bodies

Cytoplasm.  
(technically, cytoplasm is  
the protoplasm outside of  
the nucleus)

Ribosome

Endoplasmic Reticulum

Mitochondria

Mitochondria
