

When a reaction gives off energy it is called what?

When a reaction requires energy to complete it is called what?

What type of chemical link is the result of electrostatic force between oppositely charged ions?

What is the name of the force between particles caused by their electric charges?

A reaction that gets warm or hot is called a _____ Reaction?

A reaction that gets cold is called a _____ Reaction?

Is the rusting of steel exothermic or endothermic?

True or false?
It requires an input of energy to form a chemical bond.

What charge do Protons Have?

What charge do electrons have?

Endothermic

Exothermic

Electrostatic Force

Ionic Bond

Endothermic

Exothermic

False

Exothermic

Negative

Positive
