

What number is the atomic
Number of the element

below:
17 35.453

Cl

Chlorine

What is another name for the
group of elements that
already have 8 electrons in
the outer orbit?

What type of bond has
electrons jumping from the
orbit of one atom to the orbit
of another?

What type of bond has
atoms sharing
electrons?

What is the name for an
organized arrangement of
atoms

What is the name for the
organized structures formed
when we grew crystals?

What is the name for the
processes of plating metal
ions onto a surface?

In what form were the atoms
of zinc during the
electroplating process.

How many Neutrons are in
the Nucleus of:

4 9.0122

Be

Beryllium

How many Protons are in the
Nucleus of:

4 9.0122

Be

Beryllium

Noble gasses

17

Covalent bonds

Ionic Bonds

Lattice

Lattice

Metal Ions

Electroplating
