

What are the three main parts of an atom

What charge do Neutrons have?

What charge do Electrons have?

What charge do Protons have?

What are the two particles found in the nucleus called?

What is an atom that has an unbalanced number of protons and electrons called

What is an atom that loses an electron and thus has more protons than electrons called?

What is an atom that picks up a stray electron and thus has more electrons than protons called?

Name 3 ways to free up electrons

What is it called when a group of electrons collect on a surface?

Zero, zippo nothing  
They are neutral

Protons  
Neutrons  
Electrons

Positive

Negative

Ion

Protons and Neutrons

Negative Ion

Positive Ion

Negative static charge

Mechanical friction, light,  
heat or a chemical reaction
