|           | The amount of material in an object.  |
|-----------|---|
| motion.   | The energy possessed by a body because of its   |
| mass.     | The force of attraction between two objects wi  |
| derived f | The energy of a particle or system of particles rom position or condition.                |
|           | Inertia of a circular or spherical mass spinning  |
| an axis.  |   |
| Using as  | many physics terms as possible (at least 10), describe the of the Choas ball drop system. |
| Using as  | many physics terms as possible (at least 10), describe the of the Choas ball drop system. |
